End-of-Life Service Experiences and Autism Spectrum Disorder (Level 1)

What is this study about?

This study aims to understand how adults with Autism Spectrum Disorder (Level 1) engage with end-of-life service providers. We hope to learn how these service interactions influence quality of life, to improve well-being outcomes for individuals with ASDL1.

You can participate if:

1. You are over the age of 18
2. You have Autism Spectrum Disorder (Level 1)
3. You have experience with one or more of these services:
   • Palliative Care Services
   • Grief/Bereavement Services
   • Aged Care Services
   • Hospital or Emergency Services
   • Funeral Service Providers
   • Cemeteries or Crematoria

What is involved?

• An anonymous online survey (approx. 15 minutes)
• You can complete the survey via the link below:
