Understanding the workplace social challenges of individuals on the autism spectrum

Researchers at the Olga Tennison Autism Research Centre (OTARC) would like to know about the social challenges individuals on the autism spectrum have experienced in the workplace.

Who can participate?
1. Adults on the autism spectrum, who are currently employed, and aged 18 years or above
   Or
2. Supervisors or support staff who support employees on the autism spectrum in the workplace.

What is involved?
You will be asked to describe up to 10 examples of:
• times when individuals on the spectrum have misinterpreted or were not aware of the social rules in the workplace, or
• times when the social intentions of individuals on the autism spectrum have been misinterpreted by other employees

Completion time for the survey can vary from 5 to 30 minutes depending on the number of examples, and the amount of detail provided in your response.
